## PROFILE

I am always eager and highly motivated to learn new things and implement them. Also I practice solving problems to improve and hone my logic building and problem solving skills. I am disciplined and able to communicate effectively in a team setting. With a passion for continuous learning and innovation, I am excited to contribute my skills and grow as a software engineer.

## PROJECTS

### INOTEBOOK- A NOTEBOOK ON CLOUD | [SOURCE CODE](#)

MongoDB, ExpressJS, ReactJS

- Created an API using Express server and tested using Postman.
- Implemented SignUp and Login functionalities and authenticated the user using JWT authentication.
- Used Bootstrap components for frontend

### NEWSSEA- A NEWS APP | [SOURCE CODE](#)

- Fetched API key from News API.
- Implemented category wise news fetching functionality.
- Hid the API key by adding custom environment variables.

### KRAKEN- AN UNREAL ENGINE GAME | [PROJECT](#)

Unreal Engine 4 - A real time 3D creation tool

- Created a multiplayer game using Unreal Engine's drag and drop function of nodes(logic).
- Consisted of 3 levels.
- Designed the levels with the help of Unreal Engine's marketplace.
